**Rebecca Hurrell, Bobcat sales specialist for Bobcat of Barrie stands with two of the brothers that own Charles Morden Construction Inc., Chris (left) and Cody (right), at one of their jobsites. In this subdivision they were hired to do 90% of the homes.**

Morden Haulage was established in 1953 by Chris, Cody and Chad Morden’s grandfather, Charles Morden. Since 1953 the company has grown into Charles Morden Construction Inc. and provides a full range of services related to residential and commercial construction services in the civil construction field. The boys were raised from a young age helping out in the sand and gravel pits and at 12 years old they started doing jobs with their father. Eventually, the brothers took over the business when their father and uncle retired in 2010. Since then, they’ve expanded the company by purchasing a new facility, opening a 3rd gravel pit, and doubling the company’s employees, machines, trucks and overall business.

Owning and operating gravel pits to service their construction projects allows the company to eliminate the middle man usually required to supply aggregate materials and this keeps costs low for the customer. However, it’s their reputation and small town loyalty that keeps them so busy and never having to leave the Midland area

that the company calls home.

“We are a loyal family, our dad raised us to work very hard, to support the local small business community. We thrive on local support and loyalty is very important to us.

In the past we had used another brand of compact equipment. After several engine failures with our previous equipment brand the decision was made to try Bobcat® equipment. We’ve had a great experience with Bobcat and are now slowly switching more equipment to the Bobcat line.” stated Chris.

“Rebecca Hurrell, sales specialist, Bobcat of Barrie just came calling on us one day and convinced us to purchase Bobcat machines. What we like best is the service Bobcat of Barrie provides. Beck has been really good to deal with and answers all our questions. When we call down to Chuck for a part, he always seems to have it in stock. Either Jake or Paul in service will work out issues over the phone with us on items such as any coding errors. If we can’t

fix it, one of them will come down that day or next to fix it.”

We use our 3 Bobcat machines for our residential jobs, including landscaping and septic installations as well as for clean up on our larger commercial and municipal sites. We purchased the Bobcat E85 compact excavator since the recent award of several municipal contracts required a mid-size excavator with rubber tracks, as well as, good balance and lots of power when working at maximum reach.

We are very happy with Bobcat.

Thank you Chris, Cody and Chad.
