

(L to R) Frank Palleschi and Adam Palleschi, owners of Pall-Con Construction Ltd. were taking possession of their brand new Bobcat T650 compact track loader from their sales specialist, Gino Cervo at Bobcat of Toronto.

## BOBCAT MACHINES ARE STRONG, RELIABLE AND VERY VERSATILE

Adam Palleschi, president of Pall-Con Construction Ltd. and his father Frank, have more than 30 years of involvement in both heavy and light civil construction within the GTA. They have built a great reputation for themselves through their hard work, providing quality workmanship and dedication to their customers. They are proud of the long term relationships they have built with their ICI customers, some for over 20 years.

They currently own a Bobcat® S185 compact skid-steer because another construction company they know, swore

by Bobcat machines. "They were right. Bobcat machines are strong, reliable and very versatile," stated Adam. "Also, with Bobcat's endless amount of attachments, nothing else compares".

"Gino Cervo, sales specialist for Bobcat of Toronto, had recently stopped by our office in the fall and we just so happened to be in need for a track loader for this coming spring. We decided on the Bobcat T650 because of its bigger size, although it can still get into tighter areas. We will use it for grading, back filling, and removals. It will be a very versatile machine for us."

"Gino has been great. He is experienced, always on top of things, follows up, and he's also just a great guy to talk to. Not one of those pushy salesmen. I wouldn't hesitate to recommend Gino or Bobcat of Toronto."

Thanks Adam.
