1st Place
Best in Show

Martin Ivach of Green Ace Design Build was born into landscaping and horticulture. His grandfather was a master gardener for a Duke in Poland before World War II and owned a nursery after the war. His father followed in his footsteps later becoming a landscaper in Canada, and mom was a florist with a successful downtown flower shop. Martin fondly remembers his father testing him at the young age of 6, on all the common and Latin plant names on their daily walk around the nursery grounds.

Green Ace Landscaping offers boutique landscaping with an artistic flair and with the finest attention to every detail in all their hardscapes, including water features, lighting, fire features, planting, pools, and 3d design, in the regions of Halton and

Peel. They accredit these attributes to receiving the Best in Show in Canada at the Unilock Award of Excellence for multiple years. They also provide commercial snow clearing and property maintenance in the winter so they are a year-round operation.

They own four Bobcat® machines: S590, two S70 compact skid-steers and now the new Bobcat T66 R-series compact track loader.

When Martin was asked why Bobcat machines? His reply, “Best machines out there. You’re not just buying a machine, you’re also buying after care, a relationship. I can call Todd Gill, sales specialist for Bobcat of Toronto, knowing he’ll get me out of any bind. For example, snow work especially is tricky and time sensitive, we are responsible for making sure people can get in and out of parking lots safely and quickly. We can’t afford downtime. I can call Todd at 3 am if I really have to, I’ve done it before. In fact, and he’s always there for me.”

“The new lineup of Bobcat machines are years ahead. Beautiful machines. I really like the back-up camera. No more bumping into skids of stone or

fence posts. They have a one-piece arm, hydraulic, and easily accessible for maintenance. The other Bobcat machines are great, and this new one, just that much better. The 7” touch display and telematics with service alerts is awesome! It has a great compact frame to get into backyards but also has 75 hp! RC ready (integrated remote control). The remote would be good for where catch basins are, snow clearing, and pushing piles of snow.”

“I would recommend Todd Gill and Bobcat of Toronto for your next machine purchase. Todd is very personable. Not the typical used car salesman stereotype. He’s genuine and passionate, and that sells itself naturally,” stated Martin.

Thanks Martin.
