“WE HAVE ALWAYS USED **BOBCAT MACHINES FOR THEIR RELIABILITY, THEIR SMOOTHNESS, COMFORT, SPEED AND VISIBILITY”**

(L to R) Kevin Scott, president of Muskoka Landscapers and Stephen Hacker, sales specialist for Bobcat of Muskoka (Oaken Equipment).

Kevin Scott, president of Muskoka Landscapers, began his career in golf construction for ten years in the Richmond Hill area. With his expertise, he decided he wanted to start up an upscale landscape company for lakefront estate properties in the Muskoka area, offering their customers custom extravagant outdoor living areas, including pools and spas, patios and walkways, fireplaces, outdoor cooking and dining areas, outdoor showers, and sports courts. “We can be a lot more creative and still work with the natural beauty of Muskoka. We value our relationship with our staff and our customers the most. That’s what it’s all about.”

When asked why they use Bobcat® machines, Kevin’s response was “we have always used Bobcat machines

for their reliability, their smoothness, comfort, speed and visibility. They are very user-friendly. The newer models even have more capacity, reach, power and operator comfort. I am very impressed with the innovation. Bobcat is always improving. It’s important to have technology match the inside of the machine. We also have a great relationship with Bobcat of Muskoka (Oaken Equipment). Service is a very big part of it as well. We blast rock and 90% of our installations are granite, very heavy. It was fun working with my guys and Bobcat of Muskoka to figure out the thumb that worked best to lift the heavy granite.”

When asked what applications they specifically use their fleet of Bobcat compact excavators and track loaders for, Kevin replied, “clearing, grading, excavating, trenching, installing stone, boulders and granite, transporting materials around the job sites, loading and unloading trucks, and Bobcat tractors for snow removal in the winter. The Bobcat excavators and the track loaders work 60-70% of the day together, every day.”

Their eleven Bobcat machines are all on a Power Lease so they can trade in for all new machines. “It’s a big plus. Having newer machines means very limited downtime. Not that we have a lot of issues to begin with. The service department is very good at Bobcat of Muskoka. Although the main contact on a day-to-day basis, Brian Reynolds, operation manager, mainly deals with Stephen Hacker, sales specialist for Bobcat of Muskoka, I can say it’s been very easy getting deals done with both Stephen Hacker and Brandon Kaschak. We have been a customer for 10+ years with Oaken Equipment and I would 100% recommend them, and Stephen Hacker for your next Bobcat machine purchase.

Thank you, Kevin.
